

Principles of Science at Yealmpton Primary School.

Science should be engaging and encourage curiosity and questioning.

Practical, hands-on opportunities to explore and investigate.

Science should provide opportunities to investigate, problem-solve and deepen knowledge and understanding.

Science should provide outdoor learning opportunities to develop awareness of the world around us and environmental issues.

Developing a life-long interest in science.

Real-life, cross-curricular and purposeful.

Science should provide opportunities for child-led enquiry and collaborative learning.
