

Number and Place Value

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Counting	<ul style="list-style-type: none"> - count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number. -count numbers to 100 in numerals; count in multiples of twos, fives and tens 	<ul style="list-style-type: none"> -count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward 	<ul style="list-style-type: none"> -count from 0 in multiples of 4, 8, 50 and 100; -find 10 or 100 more or less than a given number 	<ul style="list-style-type: none"> -count in multiples of 6, 7, 9, 25 and 1000 -count backwards through zero to include negative numbers 	<ul style="list-style-type: none"> -count forwards or backwards in steps of powers of 10 for any given number up to 1000000 -count forwards and backwards with positive and negative whole numbers, including through zero -interpret negative numbers in context, 	<ul style="list-style-type: none"> -use negative numbers in context, and calculate intervals across zero
Representing Numbers <i>(Including reading and writing numbers)</i>	<ul style="list-style-type: none"> -identify and represent numbers using objects and pictorial representations including the number line - read and write numbers from 1 to 20 in numerals and words. - read and write numbers to at least 100 in numerals and in words 	<ul style="list-style-type: none"> -identify, represent and estimate numbers using different representations, including the number line - read and write numbers to at least 100 in numerals and in words 	<ul style="list-style-type: none"> -identify, represent and estimate numbers using different representations -read and write numbers up to 1 000 in numerals and in words 	<ul style="list-style-type: none"> -identify, represent and estimate numbers using different representations - read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value. 	<ul style="list-style-type: none"> -read, write, numbers to at least 1000000 -read Roman numerals to 1000 (M) and recognise years written in Roman numerals. 	<ul style="list-style-type: none"> -read, write numbers up to 10 000000
Understand Place Value and Comparing	<ul style="list-style-type: none"> -given a number, identify one more one less. 	<ul style="list-style-type: none"> -recognise the place value of each digit in a two-digit number (tens, ones) -compare and order numbers from 0 up to 100; use <, > and = signs 	<ul style="list-style-type: none"> -recognise the place value of each digit in a three-digit number (hundreds, tens, ones) -compare and order numbers up to 1000 	<ul style="list-style-type: none"> -recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) - find 1000 more or less than a given number -order and compare numbers beyond 1000 	<ul style="list-style-type: none"> - order and compare numbers to at least 1 000 000 and determine the value of each digit. -read Roman numerals to 1000 (M) and recognise years written in Roman numerals. 	<ul style="list-style-type: none"> -order and compare numbers up to 10 000000 and determine the value of each digit (appears also in Reading and Writing Numbers)
Rounding				<ul style="list-style-type: none"> -round any number to the nearest 10, 100 or 1000 	<ul style="list-style-type: none"> -round any number up to 1 000 000 to the nearest 10, 100, 1 000, 10 000 and 100 000 	<ul style="list-style-type: none"> -round any whole number to a required degree of accuracy
Problem Solving		<ul style="list-style-type: none"> -use place value and number facts to solve problems 	<ul style="list-style-type: none"> -solve number problems and practical problems involving these ideas. 	<ul style="list-style-type: none"> -solve number and practical problems that involve all of the above and with increasingly large positive numbers 	<ul style="list-style-type: none"> -solve number problems and practical problems that involve all of the above 	<ul style="list-style-type: none"> -solve number and practical problems that involve all of the above

Addition and Subtraction

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Number Bonds	-represent and use number bonds and related subtraction facts within 20	-recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
Mental and Written Calculations	-add and subtract one-digit and two-digit numbers to 20, including zero -read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs	-add and subtract numbers using concrete objects, pictorial representations, and mentally, including: * a two-digit number and ones * a two-digit number and tens * two two-digit numbers * adding three one-digit numbers -show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot	-add and subtract numbers mentally, including: * a three-digit number and ones * a three-digit number and tens * a three-digit number and hundreds - add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	-add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate	-add and subtract numbers mentally with increasingly large numbers -add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)	-perform mental calculations, including with mixed operations and large numbers -use their knowledge of the order of operations to carry out calculations involving the four operations
Inverse operations, estimating and checking		-recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	-estimate the answer to a calculation and use inverse operations to check answers	-estimate and use inverse operations to check answers to a calculation	-use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	-use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.
Problem Solving	-solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$	-solve problems with addition and subtraction: * using concrete objects and pictorial representations, including those involving numbers, quantities and measures * applying their increasing knowledge of mental and written methods	-solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction	-solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	-solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	-solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why

Multiplication and Division

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Recall, Represent and Use	<ul style="list-style-type: none"> -count in multiples of twos, fives and tens 	<ul style="list-style-type: none"> -count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward -recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers - show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot 	<ul style="list-style-type: none"> -count from 0 in multiples of 4, 8, 50 and 100 -recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables 	<ul style="list-style-type: none"> -count in multiples of 6, 7, 9, 25 and 1000 -recall multiplication and division facts for multiplication tables up to 12×12 - use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers - recognise and use factor pairs and commutativity in mental calculations 	<ul style="list-style-type: none"> - count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000 -identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers. -know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers -establish whether a number up to 100 is prime and recall prime numbers up to 19 recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3) 	<ul style="list-style-type: none"> -use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy
Calculations		<ul style="list-style-type: none"> -calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals (=) signs 	<ul style="list-style-type: none"> -write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods 	<ul style="list-style-type: none"> -multiply two-digit and three-digit numbers by a one-digit number using formal written layout 	<ul style="list-style-type: none"> -multiply and divide numbers mentally drawing upon known facts -multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers -divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context -multiply and divide whole numbers and those involving decimals by 10, 100 and 1000 	<ul style="list-style-type: none"> -perform mental calculations, including with mixed operations and large numbers -multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication -divide numbers up to 4-digits by a two-digit whole number using the formal written method of short division where appropriate for the context -divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context.

Problem Solving and Combined Operations	<p>-solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher</p>	<p>-solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts</p>	<p>-solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects</p>	<p>-solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects</p>	<p>-solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes</p> <p>-solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates</p> <p>-solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign</p>	<p>-solve problems involving addition, subtraction, multiplication and division</p> <p>-use their knowledge of the order of operations to carry out calculations involving the four operations</p>
--	---	---	---	--	---	--

Fractions

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Recognising and Writing	<ul style="list-style-type: none"> -recognise, find and name a half as one of two equal parts of an object, shape or quantity -recognise, find and name a quarter as one of four equal parts of an object, shape or quantity 	<ul style="list-style-type: none"> -recognise, find, name and write fractions $\frac{1}{3}$, $\frac{1}{4}$, $\frac{2}{4}$ and $\frac{3}{4}$ of a length, shape, set of objects or quantity 	<ul style="list-style-type: none"> -recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators -count up and down in tenths -recognise that tenths arise from dividing an object into 10 equal parts and in dividing one – digit numbers or quantities by 10. -recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators 	<ul style="list-style-type: none"> -count up and down in hundredths -recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten 	<ul style="list-style-type: none"> - identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths - recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number (e.g. $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$) 	
Comparing and Equivalence		<ul style="list-style-type: none"> -recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$. 	<ul style="list-style-type: none"> - compare and order unit fractions, and fractions with the same denominators - recognise and show, using diagrams, families of common equivalent fractions 	<ul style="list-style-type: none"> -recognise and show, using diagrams, families of common equivalent fractions. 	<ul style="list-style-type: none"> -compare and order fractions whose denominators are all multiples of the same number 	<ul style="list-style-type: none"> -compare and order fractions, including fractions > 1 -use common factors to simplify fractions; use common multiples to express fractions in the same denomination
Calculations		<ul style="list-style-type: none"> -write simple fractions e.g. $\frac{1}{2}$ of $6 = 3$ 	<ul style="list-style-type: none"> -add and subtract fractions with the same denominator within one whole (e.g. $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$) 	<ul style="list-style-type: none"> -add and subtract fractions with the same denominator 	<ul style="list-style-type: none"> -add and subtract fractions with the same denominator and multiples of the same number -multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams 	<ul style="list-style-type: none"> -add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions -multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$) -divide proper fractions by whole numbers (e.g. $\frac{1}{3} \div 2 = \frac{1}{6}$)
Problem Solving			<ul style="list-style-type: none"> -solve problems that involve all of the above 	<ul style="list-style-type: none"> -solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number 		

Decimals

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Recognising and Writing				-recognise and write decimal equivalents of any number of tenths or hundredths - recognise and write decimal equivalents to $\frac{1}{4}$; $\frac{1}{2}$; $\frac{3}{4}$	-read and write decimal numbers as fractions (e.g. $0.71 = \frac{71}{100}$) -recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	-identify the value of each digit in numbers given to three decimal places
Comparing and Equivalence				-round decimals with one decimal place to the nearest whole number - compare numbers with the same number of decimal places up to two decimal places	-read, write, order and compare numbers with up to three decimal places - round decimals with two decimal places to the nearest whole number and to one decimal place	
Calculations and Problem Solving				-find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths	-solve problems involving numbers up to three decimal places	-multiply one-digit numbers with up to two decimal places by whole numbers -multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places -use written division methods in cases where the answer has up to two decimal places -solve problems which require answers to be rounded to specified degrees of accuracy

Fractions, Decimals and Percentages

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Fractions, Decimals and Percentages				-solve simple measure and money problems involving fractions and decimals in two decimal places.	-recognise the per cent symbol (%) and understand that per cent relates to “number of parts per hundred”, and write percentages as a fraction with denominator 100 as a decimal. -solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{4}{5}$ and those with a denominator of a multiple of 10 or 25.	-associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. $\frac{3}{8}$) -recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.

Ratio and Proportion

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<p>Ratio and Proportion <i>Statements only appear in Year 6 but should be connected to previous learning, particularly fractions and multiplication and division</i></p>						<p>-solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts</p> <p>-solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison</p> <p>-solve problems involving similar shapes where the scale factor is known or can be found</p> <p>-solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.</p>

Measurement

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Using Measures	<p>-compare, describe and solve practical problems for:</p> <ul style="list-style-type: none"> * lengths and heights [e.g. long/short, longer/shorter, tall/short, double/half] * mass/weight [e.g. heavy/light, heavier than, lighter than] * capacity and volume [e.g. full/empty, more than, less than, half, half full, quarter] * time [e.g. quicker, slower, earlier, later] <p>- measure and begin to record the following:</p> <ul style="list-style-type: none"> * lengths and heights * mass/weight * capacity and volume * time (hours, minutes, seconds) 	<p>-compare and order lengths, mass, volume/capacity and record the results using >, < and =</p> <p>-choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels</p>	<p>-measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)</p>	<p>-convert between different units of measure (for example, kilometre to metre; hour to minute)</p> <p>-estimate, compare and calculate different measures.</p>	<p>-convert between different units of measure (for example, kilometre to metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)</p> <p>-understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints.</p> <p>- use all four operations to solve problems involving measure (e.g. length, mass, volume, money) using decimal notation including scaling.</p>	<p>-solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate.</p> <p>- use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places</p> <p>- convert between miles and kilometres</p>
Money	<p>--recognise and know the value of different denominations of coins and notes</p>	<p>-recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value</p> <p>-find different combinations of coins that equal the same amounts of money</p> <p>-solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change</p>	<p>-add and subtract amounts of money to give change, using both £ and p in practical contexts</p>	<p>-estimate, compare and calculate different measures, including money in pounds and pence</p>	<p>-use all four operations to solve problems involving measure (e.g., money) using decimal notation including scaling.</p>	

<p style="text-align: center;">Time</p>	<p>-sequence events in chronological order using language [e.g. before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening] -- recognise and use language relating to dates, including days of the week, weeks, months and years - tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.</p>	<p>compare and sequence intervals of time tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times. know the number of minutes in an hour and the number of hours in a day. (appears also in Converting)</p>	<p>tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks -estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as a.m./p.m., morning, afternoon, noon and midnight - know the number of seconds in a minute and the number of days in each month, year and leap year -compare durations of events, for example to calculate the time taken by particular events or tasks</p>	<p>-read, write and convert time between analogue and digital 12 and 24-hour clocks - solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days</p>	<p>-solve problems involving converting between units of time</p>	<p>- use, read, write and convert between standard units, converting measurements of time from a smaller unit of measure to a larger unit, and vice versa,</p>
<p style="text-align: center;">Perimeter, Area and Volume</p>			<p>-measure the perimeter of simple 2-D shapes</p>	<p>-measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres -find the area of rectilinear shapes by counting squares</p>	<p>-measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres -calculate and compare the area of squares and rectangles including using standard units, square centimetres (cm²) and square metres (m²) and estimate the area of irregular shapes - estimate volume (e.g. using 1 cm³ blocks to build cubes and cuboids) and capacity (e.g. using water)</p>	<p>-recognise that shapes with the same areas can have different perimeters and vice versa -recognise when it is possible to use formulae for area and volume of shapes -calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm³) and cubic metres (m³), and extending to other units such as mm³ and km³.</p>

Geometry

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
2-D Shapes	-recognise and name common 2-D shapes, including: * 2-D shapes [e.g. rectangles (including squares), circles and triangles]	-identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line -identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid] - compare and sort common 3-D shapes and everyday objects	-draw 2-D shapes	-compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes	-distinguish between regular and irregular polygons based on reasoning about equal sides and angles - use the properties of rectangles to deduce related facts and find missing lengths and angles	- draw 2-D shapes using given dimensions and angles - compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons -illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius
3-D Shapes	-recognise and name common 3-D shapes, including: * 3-D shapes [e.g. cuboids (including cubes), pyramids and spheres].	- identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces -compare and sort common 3-D shapes and everyday objects	-make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them		-identify 3-D shapes, including cubes and other cuboids, from 2-D representations	-recognise, describe and build simple 3-D shapes, including making nets
Position and Direction	-describe position, direction and movement, including whole, half, quarter and three quarter turns.	-use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise) - order and arrange combinations of mathematical objects in patterns and sequences		-describe positions on a 2-D grid as coordinates in the first quadrant -describe movements between positions as translations of a given unit to the left/right and up/down -plot specified points and draw sides to complete a given polygon	-identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed	-describe positions on the full coordinate grid (all four quadrants) -draw and translate simple shapes on the coordinate plane, and reflect them in the axes.
Angles and Lines			-recognise angles as a property of shape or a description of a turn. -identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle -identify horizontal and vertical lines and pairs of perpendicular and parallel lines	-identify acute and obtuse angles and compare and order angles up to two right angles by size --identify lines of symmetry in 2-D shapes presented in different orientations -complete a simple symmetric figure with respect to a specific line of symmetry	-know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles -draw given angles, and measure them in degrees ($^{\circ}$) - identify: * angles at a point and one whole turn (total 360°) * angles at a point on a straight line and $\frac{1}{2}$ a turn (total 180°) * other multiples of 90°	-recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles -find unknown angles in any triangles, quadrilaterals and regular polygons.

Statistics

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Interpreting, and Presenting Data		-interpret and construct simple pictograms, tally charts, block diagrams and simple tables	-interpret and present data using bar charts, pictograms and tables	-interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs	-complete, read and interpret information in tables, including timetables	-interpret and construct pie charts and line graphs and use these to solve problems
Solving problems		-ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity -ask and answer questions about totalling and comparing categorical data	-solve one-step and two-step questions [e.g. 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.	-solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.	-solve comparison, sum and difference problems using information presented in a line graph	-calculate and interpret the mean as an average

Algebra

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Equations	Algebraic Thinking: -solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$ (copied from Addition and Subtraction)	Algebraic Thinking: -recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. (copied from Addition and Subtraction)	Algebraic Thinking: - solve problems, including missing number problems. (copied from Addition and Subtraction) -solve problems, including missing number problems, involving multiplication and division, including integer scaling (copied from Multiplication and Division)		Algebraic Thinking: -use the properties of rectangles to deduce related facts and find missing lengths and angles (copied from Geometry)	-express missing number problems algebraically -find pairs of numbers that satisfy number sentences involving two unknowns -enumerate all possibilities of combinations of two variables
Formulae and Sequences	Algebraic Thinking: -sequence events in chronological order using language such as: before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening (copied from Measurement)	Algebraic Thinking: compare and sequence intervals of time (copied from Measurement) order and arrange combinations of mathematical objects in patterns (copied from Geometry)		Algebraic Thinking: -Perimeter can be expressed algebraically as $2(a + b)$ where a and b are the dimensions in the same unit.		-use simple formulae -recognise when it is possible to use formulae for area and volume of shapes (copied from Measurement) --generate and describe linear number sequences.
